Valiant's Triple Protection

Valiant Pre-Post is:

1. Repair Aid for Hyperkeratosis & Teat Skin Condition

- Lactic acid softens hyperkeratosis
- Lactic acid exfoliates dry skin
- High level of skin conditioners support a return to healthy teats
- Allow for easier removal of dead skin during prep procedure

2. Broad Spectrum

- Kill mechanism is not affected by milk film
- Effective against contagious & environmental pathogens including viruses, molds, pseudomonas & mycoplasma
- Iodine kill mechanism is less specific so it's negatively affected by organic matter as PH increases

3. Environmentally Friendly

- Reduces into table salt
- Not harsh on skin
